Career Objective

Entry-level MERN Stack Developer with skills in React, Node.js, Express.js, and MongoDB. Seeking a position to build efficient, scalable, and user-friendly web applications. Motivated to learn, follow clean coding standards, work in a collaborative team, and grow while contributing to company projects and goals.

Technical Skills

Frontend : TailwindCSS, JavaScript, React.js, Next.js

Backend : Express.js, Node.js, MongoDB, Firebase (Auth, Hosting), JWT, REST APIs

Version Control & Deployment : Git, GitHub, Vite, Vercel, Netlify, Cloudflare

Soft Skills : Team Collaboration, Time Management, Communication

Projects

1. Course Land — is an E-learning platform

[Live](#) | [Client](#) | [server](#)

- Implemented an Instructor Dashboard for adding, updating, selling, and deleting courses.
- Users can filter courses based on categories for easier browsing
- Auth System with Email/Password and Google sign-in

Tech stack : TailwindCSS, JavaScript, React.js, Node.js, Express.js and MongoDB

2. Pet Frosty — is a Winter Pet Care Platform

[Live](#) | [Repository](#)

- Fully responsive, works seamlessly on mobile, tablet, and desktop.
- Users can update their name, address, avatar, and view their profile changes in real time.
- Auth System with Email/Password and Google sign-in

Tech Stack : TailwindCSS, JavaScript, React.js

3. Book Crafters — is a Digital Book Library & Management platform

[Live](#) | [Client](#) | [Server](#)

- Built using Next.js (App Router)
- Implemented dynamic book management with full CRUD operations and detailed book pages.
- Designed a clean, responsive UI for seamless use across all devices.
- Built a secure system with user authentication, protected private routes, and custom error handling

Tech stack : TailwindCSS, JavaScript, Next.js, Node.js, Express.js and MongoDB
